

Sanders Smoke Technologies Production Technician

Sanders Smoke Technologies produces Self Contained Smoke Generators that are attached to aircraft for air shows and other purposes. Known for the Smokewinder generator, these are the same dimensions as the Sidewinder missile and have been attached to ~ 40 aircraft types worldwide over the last 50 years. We are looking for a highly motivated and quick learning individual to join our team and possesses the following skillsets:

- Experience in a production environment and possesses the following skillsets:
 - Assembly
 - Fabrication
 - Paint Preparation
 - General Welding
- CNC experience including programming, setup, production, and maintenance.
- An in-depth understanding of SolidWorks CAD Program including creating, editing, and maintaining CAD files.
- Have the ability to follow build procedures and instructions per Sanders Smoke Technologies quality standards.
- A willingness to work well with others and follow processes and guidance as required.
- Adapt to a fast-moving environment, one that can see multiple job responsibilities in any given day.
- Ability to work independently as well as in a team environment depending on the deliverables of the day.
- Be able to work in a shop environment, both inside the hangar and outside during all seasons during the year.

This position will lead Smokewinder production on the shop floor with guidance from the Production Manager. This is a critical position within the organization and will have a production assistant to help in the production process.

Additional Details

- Full time position that includes benefits (Medical and 401K contributions.)
- Competitive pay rates based on experience and skillset. Paid vacation and sick time included.
- Work in a 50-year-old family-owned established business known throughout the world.
- Sanders Smoke Technologies works hand in hand with Sanders Aeronautics, a world-known warbird aircraft restoration and maintenance facility.
